

Spike Enterprise, Inc., was established in April of 1987 by Dan and Debbie Spicer. Spike was originally a solids control rental company. The term, "solids control" describes a service provided in the oil well drilling industry. Spike would design, operate, lease and service many different types of solids control equipment, specifically decanting, bowl centrifuges. This equipment is used to clean sand, silts, clays, shales, and other contaminants from the drilling fluid (drilling mud) while the drilling operation is in progress. This type of work has given Spike the opportunity to look at many different types of equipment, chemical processes, environmental working conditions, and 24 hours continuous operation.

Spike is still currently working in the drilling industry in the solids control business, but in 1990 Spike elected to expand our services to other industries. The other industries and fields we have expanded to are the oil refining industry, the municipal wastewater treatment facilities, chemical production facilities, electrical power generating stations, and more. Spike found that the technology that we developed and our ability to be flexible on our site approach, gives us a distinct advantage in the above mentioned fields.

Spike Enterprise, Inc. has developed a philosophy of being innovative in our system design and operations. This has allowed Spike to design both one time clean-up operations and ongoing projects that are site specific and very cost effective. Spike looks at every clean-up situation on a case by case basis. This allows us to develop a scope of work that will be the most effective for the customer.

Spike Enterprise, Inc., places our highest priority on the safety of our personnel and the environment they are working in. All of our site supervisors and equipment operators are 40 Hazwoper trained. Spike also has additional training for site specific jobs and materials we could encounter at the job site. Our personnel have worked with a wide range of hazardous and non-hazardous materials and environments. Our personnel are trained in confined space entry, lock-out & tag-out procedures, and self contained breathing apparatus use; this is a must when wanting to provide a full line service company to the client.

Health and Safety Awards

Due to our high standard for health and safety at the job site, Spike has chosen to use a professional safety company on all jobs that require confined space entry with fresh air. This policy has contributed to a no lost time accident record for the past five years.

Our Awards:

- ExxonMobil Ace of Diamonds RSOI Award 2007
- ExxonMobil Bronze Safety Award 2007
- ExxonMobil Gold Safety Award 2008
- ExxonMobil Gold Safety Award 2006
- ExxonMobil Gold Safety Award 2004
- ExxonMobil Gold Safety Award 2002
- ExxonMobil Gold Safety Award 2001
- ExxonMobil Gold Safety Award 1999
- Mobil Oil Corporation Merit Safety Award 1997
- Mobil Oil Corporation Merit Safety Award 1996
- National Safety Council Member Since 2008-2009
- Oklahoma Safety Council Good Standing Member 2001
- Three Rivers Safety Council Gold Award 2007
- Three Rivers Safety Council Gold Award 2006
- Three Rivers Safety Council Gold Award 2005
- Three Rivers Safety Council Gold Award 2001
- Three Rivers Safety Council Safety Achievement Award 2000
- Three Rivers Safety Council Meritorious Performance 2008
- Three Rivers Safety Council Meritorious Performance 2007
- Three Rivers Safety Council Meritorious Performance 2006
- Three Rivers Safety Council Meritorious Performance 2005
- Three Rivers Safety Council Meritorious Performance 2003
- Three Rivers Safety Council Meritorious Performance 2002
- Three Rivers Safety Council Meritorious Performance 2001

Services Offered

Industrial Cleaning

- Tank Cleaning
- Vessel Cleaning
- Pits, Ponds, Lagoons
- Towers
- Cooling Towers
- Aeration Tanks, Ponds
- Sewers
- Waste Water Treatment Facilities

Hazardous Waste Services Waste Minimization Planning and Processing

Vacuum Truck Services

- Liquid
- High Velocity Wet / Dry Super Vac
- Hydro Excavating

Solid Separation Services

- High Speed two Phase Centrifuges
- High Speed oil/water Centrifuges
- Filter Presses
- Dryers

Water Washing/Hydro Blasting Roll-Offs and Roll-Off Truck, in plant Services Air Moving and/or Scrubbing Services Emergency Spill Response Specialized Equipment Design Facilities Support

Maintenance

- Pipe Line Support and Repair
- Tank Gauge Repair
- Valve Maintenance
- Seal Repair
- Pipe and Flange work
- Welding
- Tank Maintenance and Repair
- Storm and Sewer Line Plugging and Bypass

Operations

- Tank Gauging
- Product Transfers
- Product Sampling
- Facility Monitoring

Industrial Cleaning

Spike Enterprise, Inc. provides a full line of Industrial Cleaning Services, such as large Diameter Tanks, Pits, Ponds, Lagoons, and Cooling Towers. With a strong emphasis on cleaning tanks such as crude storage tanks, caustic tanks, gas oil, slop oil, asphalt, and all types of finished product tanks. Spike has developed a line of specialized equipment designed specifically for removing heavy sludges from different types of tanks regardless of their size.

Training and Safety

All of our field personnel have extensive training. We specialize in handling large amounts of hazardous waste.

Waste Minimization Planning

We specialize in chemically enhanced centrifugation. This is a procedure where we use chemicals in conjunction with our centrifuges to aid in the removal of ultra-fine solids. This can result in a much smaller volume you have to dispose of.

Vacuum Truck Services

Spike Enterprise, Inc. offers a wide range of specialized Vacuum Trucks. We carry liquid trucks all the way up to high volume solids handling trucks. Some of our trucks can be used for Hydro Excavating.

Hydro Blasting

We offer a range of 10K and 20K washing abilities. We also use this ability to clean sewers and vaults.

Air Scrubbing Systems

Spike Enterprise, Inc. has a unique innovative approach to handle large volume vapor issues. We offer small carbon air systems all the way up to our Counter Current Spray Tower Absorber.

Specialized Equipment Design

Spike Enterprise, Inc. also offers design, engineering, fabrication, installation, training and operation of all types of specialized equipment. Spike has designed, fabricated, installed and / or operated equipment such as:

- Remote Controlled (Explosion Proof) Dredges
- Slurry Tank Mixing System
- Air Scrubbing Towers
- Particulate / Carbon Filter System (Amine Scrubbers)

... And much more.
